SUMMARY

I'm a full-stack developer with 4 years of formal experience in the industry. I enjoy programming software across a wide range of technologies, including firmware, SPAs, and mobile apps. Additionally, I have experience in customer support and computer hardware, including troubleshooting, system maintenance, remote assistance, bug tracking, and training personnel on new features. I am a native Spanish speaker and proficient in English, with a C1 level (ESFET) certification.

EXPERIENCE

Ssr Full-stack Developer

CityLab

September 2023 - October 2024 • San Salvador, El Salvador

- Contributed to the development of an ERP system for El Salvador's national water utility (ANDA), utilizing SQL Server, .NET, React.js, and React Native.
- Automated over 150 different processes, significantly reducing operational time and improving system accuracy.
- Supported the creation of a stock management system for El Salvador's National Healthcare Ministry to manage medical supplies nationwide.

Full-stack Developer

Focus IT Outsourcing

August 2022 - August 2023 • San Salvador, El Salvador.

- Collaborated with a USA-based client to develop an ERP system for franchises using the MERN stack.
- Managed Docker container deployments to DigitalOcean, improving system performance and reliability.
- Participated in agile development, contributing to scrum meetings and code reviews.
- Provided technical guidance to junior developers and enhanced project delivery efficiency.

Full-stack Developer & Customer Support

Open Solutions Systems

February 2022 - August 2022 • El Salvador

- Developed and maintained POS and stock management systems.
- Provided technical support to clients with resilience and composure, resolving issues and deploying new features under pressure.
- Worked closely with customers to ensure system functionality, ensuring uptime and improving customer satisfaction through proactive solutions.

Web Developer Contract

"Rogelio Salmerón" Rent-A-Car

June 2021 - January 2022 • El Salvador

- Automated repair shop processes, including budget creation, money flow reports, and job progress tracking using Laravel, MySQL, and Hostinger.
- Trained personnel on the functionality of new systems and essential computer skills.
- Improved process efficiency and reduced manual entry time significantly.

Freelancer Developer

Several Customers

January 2020 - May 2021 • Remote

- Developed vending machine firmware using ESP32 (Arduino) with a web-based interface for remote parameter updates, including pricing, quantities, and labels.
- Built a sports social media app (Flutter, Firebase) with rich-text posts, likes, comments, and an interactive map for clubs and events.
- Designed a stock management system (MS Access) with pricing, inventory tracking, and CRUD operations for products, stores, and suppliers.

EDUCATION

High School in Finance and Administration

National Institute of Usulután, El Salvador

Bachelor in Software Engineering

National University of El Salvador
